FOLD QUALITY & RELIABILITY

KIPFold 1800 with KIP System K Software integration provides seamless workflow.

KIPFold 1800 is built to exacting standards, featuring a metal frame and stainless steel feed guide with low static transfer system for consistent and reliable operation. High quality components, sensors, precision bearings and solid design ensure precision and accurate folding.

The KIPFold 1800 uses proven folding technology based on a precision roller design for high production print environments. KIPFold 1800 offers industry leading fold quality, exact fold delivery, precise packets, and crisp fan folded documents.

PRECISE FOLDS

RELIABILITY

SAVES TIME

VERSATILE PRODUCTION

Quiet Unattended Automation

The KIP 1800 folding system features uninterrupted folding production and the flexibility to fold documents with consistent precision. Prints are folded allowing for easy document filing and distribution in portrait format, to portrait packets.

A reliable and durable fold roller system ensures maximum packet production that reduces operator interaction. Users may conveniently select fold style preferences or no folding at their workstation before printing.

KIPFold 1800 Features:

- Portrait Packet Styles
- Offline Manual Folding (Optional)
- Conveyor Stacking up to 80 Packets

This unique integrated solution allows complete control of the folder and folding packets directly from all KIP Applications including the KIP Touchscreen, KIP ImagePro, KIP PrintPro.NET, KIP Windows and AutoCAD drivers.

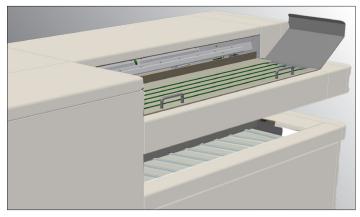

KIP System K Software allows all user levels to easily create and prepare prints for folding through the uniform software interface and application process.

KIPFold 1800 System K Software Features:

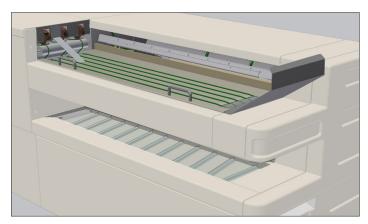

- Simplify custom folds with preset editor
- Print submission via PC and print drivers
- System error reporting through email notification
- Intelligent job recovery for accurate print accounting
